## FOREWORD

The opportunity of presenting our 1952 catalog gives us much pleasure. We hope you will give it your careful consideration, and that it will be helpful to you in deciding to try some of the varieties herein listed and described.

1952 will add up to twenty-one years of Glad growing for us, and this is our tenth annual catalog issued. We are proud to say that during all these years of shipping bulbs **WE HAVE NEVER RECEIVED A SINGLE COMPLAINT REGARDING THE QUALITY OF OUR BULBS**, but are receiving more and more letters from our customers complimenting us on the nice, clean, healthy bulbs we sent them and our generous count and extras.

We thank all our costumers for the orders sent us during the past and for the nice letters we have received from them. **KINDLY ACCEPT OUR DEEPEST APPRECIATION.** We pledge to continue our policy to merit your confidence during the years to come.

To those who have never sent us an order, **WON'T YOU GIVE US A TRIAL? WE GUARANTEE SATISFACTION!**

### OUR BUSINESS POLICY:

We do not substitute unless instructed to do so. On orders totaling less than \$2.50, please add 25c extra to cover cost of packing and postage. All retail orders totaling \$2.50 or more will be delivered free anywhere in the United States. Wholesale orders, f. o. b., Hagerstown, Maryland. No bulblet orders accepted after April 1st. All orders subject to prior sale. We promptly acknowledge all orders received. All orders to be paid in full before shipment. Where items are quoted 2 for 25 cents or 2 for 30 cents, etc., please do not order a smaller amount at a lower price. However, please be assured that no order is too small to receive our careful attention.

### WHOLESALE PRICES:

10 bulbs will be sold at 8 times the price per each, unless otherwise quoted.

100 bulbs will be sold at 8 times the price for 10.

5 bulbs at the 10 rate — 25 bulbs at the 100 rate.

Write us for prices on larger lots — or send us your want list for quotations, stating quantity and size of bulbs interested in.

### BULB SIZES:

Bulbs listed, is diameter in inches, as follows: **LARGE**  $1\frac{1}{4}$  inches and up, most  $1\frac{1}{2}$  to  $1\frac{3}{4}$ . **MEDIUM**  $\frac{3}{4}$  to  $1\frac{1}{4}$ . **SMALL**  $\frac{1}{4}$  to  $\frac{3}{4}$ . Large bulbs produce the better spikes and bloom; medium, not so big; and small bulbs produce still smaller bloom. Some varieties of bulblets will bloom if planted early and season is favorable. some are difficult to germinate. For small lots of high priced bulblets, we recommend peeling them very carefully just befor planting. **CULTURAL DIRECTIONS ON PAGE TEN.**

### EXTRAS:

We have always given generously in both count and extras. We believe this is much better than figuring discounts and we are sure that you will be well pleased.

Why not pay us a visit; we are always glad to receive visitors, shake their hand and show them through our plantings. We have 17 acres within the city limits and are easy to locate. Greatest number of varieties should be blooming between August 15th and September 15th; however, you will always see something worth while from August 1st on.

Most truly yours,

*E. Bane Snyder*

## 1952 Introductions

# ELEVATION

**ELEVATION**—Class 442 (Picardy x Beacon) Seedling PB4.

Deep Pink with yellow throat, up to 72 inches tall and no crooks, 8—4¾ in. florets open on an 18 bud, 25 inch flower head, good facing, good substance and good attachment. Named for its uniform height, **ELEVATION** is the easiest cutter in our fields. You can cut nice long spikes without disturbing the foliage. Makes fine-looking disease resistant bulbs, and lots of bulblets that germinate readily. Plant is a strong grower. Blooms in 90-95 days.

Extra good for basket work (see picture on front cover).

# DREAMLAND

**DREAMLAND** has won (A) ratings in the seedling class at two or more shows.

Apple blossom pink with garnet throat blot, 55 inches and more tall, 6—4 in. florets open on a 25 in. flower head of 18 buds. Does not crook, good facing, good texture, good attachment, and a good producer of nice bulbs with lots of bulblets that germinate easily. Extra good commercial and show table variety. **DREAMLAND** has won (A) ratings in the seedling class at two or more shows. Blooms in 80 days.

Both the above varieties have won a lot of blue ribbons in the open classes at Eastern shows and are A1 in every way. The florists take all available spikes.

We have a nice lot of bulbs of each, hence the low introductory price.

ANY SIZE BULB \$1.00 — BULBLETS 10 for \$1.00, 100 for \$8.00

(Catalogers and growers unit prices on request)

## OUR PREVIOUS INTRODUCTIONS

### MELLOW MOON

**MELLOW MOON**—Class 420 (King Midas x Leading Lady) Seedling KMPC8.

A beautiful light orange, nearly self color, for which the name **MELLOW MOON** is a natural and best describes its mellow glowing color. Truly a new era in golden color which is entirely different.

Opens eight good facing well attached 4¾ to 5½ inch florets with good substance on a 18 to 20 bud 28 to 30 inch flower head with six buds showing color. Medium very stiff spike, grows 60 inches and more tall. Florets are nicely ruffled and waved. Opens to tip of spike when cut in tight bud.

Produces large amount of bulblets which germinate easily making fine-looking bulbs. Tops for both exhibition and commercial growing.

Blooms in 80 to 85 days.

For a new variety—**MELLOW MOON** has won a lot of blue ribbons. Under seedling number KMPC8 it won a blue ribbon in the three spike seedling class at Madison, Wisconsin. Show, 1948. During 1949 at the Maryland State Show, Havre de Grace, it received an A rating in the seedling class, and a blue ribbon in the basket class. At the Eastern International Show, Binghamton, N. Y., under seedling number it won a blue ribbon in the basket class (as per picture on back).

During 1950 **MELLOW MOON** won blue ribbons in the single spike class at the Iowa State show and the Keystone Pennsylvania show.

Judging from the great number of favorable comments received, **MELLOW MOON** is sure to go over in a big way.

Per each: L—\$1.00; M—.75; S—.50

10—\$8.00; 50—\$6.00; 100—\$4.00

Bbts.: 3 for 30; 10 for .75; 100 for \$6.00

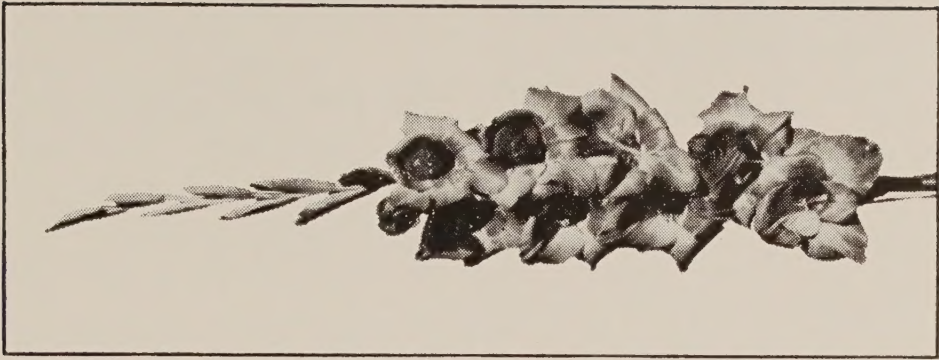

**(Rewi Fallu x (Vagabond Prince x Beacon))**

**ANTIETAM** is a real glad for both show table and commercial growing; cuts nice large spikes from medium and small bulbs. **ANTIETAM** opens fine when cut in bud and is a good keeper; one of the very few varieties that doesn't suncook or rain spot—and no crooks!

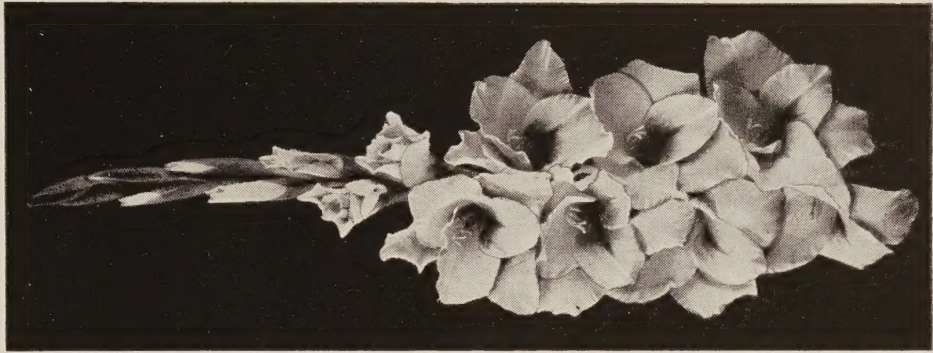

For larger quantities see wholesale list.

WILMA DITTMAN (Maier 49) 516—A clear buff with faint scarlet lines deep in the throat. Petals of heavy texture and nicely frilled. Grows 5 feet tall with 20 buds, of which 8 six inch florets are open in perfect placement. Should be a good show glad.	1 10	.75 6.00	.50 4.00			

### GLADIOLUS CULTURE

Note: The following instructions apply to average normal growing conditions; should unusual soil or climatic conditions prevail, the amateur gladiolus grower should consult his County Agricultural Agent or a local gladiolus grower.

**Stock for Planting:** Secure healthy stock from a reliable source specializing in quality gladiolus bulbs. Look over all Bulbs and discard any that show signs of rot. Maximum size blooms usually are obtained from large plump bulbs; better results can be expected from young high-crowned bulbs of at least 1-inch in diameter than from older and larger "thin" bulbs. As a safe-guard against thrips all bulbs, regardless of source, should be dusted with DDT (5%) as soon as received by the purchaser. (We guarantee our bulbs to be healthy and free of thrip when you receive them, but if they are placed in close proximity to bulbs already infested, they may become infested also).

**Dips:** Dips control disease. Dip your own bulbs and those you buy, before planting. Two proven formulas: New Improved Ceresan, one ounce (approximately 4 level tablespoons) plus 3 teaspoon measures duPont (Grasselli) Spreader Sticker or Dreft to 3 gallons water. Mix N.I.C. in sauce dish with Spreader Sticker, use wooden ladle (keep fingers out, poison to skin in this concentrated form), then add to 3 gallons water. (Okay for hands to be in this weakened solution.) Soak bulbs 15 minutes, plant in damp soil same day. Bulblets not peeled, 30 minutes, peeled, 15 minutes. Plant same as above. Another dlp: Lysol, one and a half tablespoonfuls per gallon of water. Soak bulbs 3 hours, bulblets 3 hours. Plant same day.

**Planting:** Plant when your trees are leafing out and soil has warmed, and can be planted anytime till July 1st. Almost any soil will do if well drained. Plant in full sunshine, in rows as you would corn. Rows at least 18 inches apart. Plant large bulbs 4 to 6 inches deep, depending on soil. Light soil deepest, smaller bulbs in proportion. Bulblets one and a half inches deep, one inch apart in rows, not closer. Plant Gladiolus away from trees and buildings. Rotate plantings. Plant in same ground but once in four years. Any soil that will grow a good crop of vegetables or weeds is good for Gladiolus.

**Fertilizing:** Fertilize—yes and no, use your own judgment but never plant Gladiolus bulbs where they might touch green manure (any kind), or come in contact with fertilizer. Novice growers better let fertilizers alone.

**Cultivation:** Cultivate once a week not deeper than 2 inches. If it rains, repeat after soil becomes workable (so it will not clod). Keep your garden free of weeds, they take the same water and feed on the same elements as your Gladiolus.

**Watering:** After fourth or fifth leaf appears (four or five weeks before blooming), water once a week or ten days, one inch of water, if you don't get rain in that amount. Set a flat container in your patch. One inch of water in the container indicates one inch of water for that period. After bud spikes appear, same amount of water twice a week.

**Spraying:** Dust with D.D.T. 5% about once every ten days after plants are up 6 to 8 inches, or spray with 50% wettable D.D.T. one oz. in 3 gal. water. Repeat after a rain. Both control Thrips. Best time to dust, in evening when wind is down. Dust should be like light fog. If light breeze let dust float over patch, start to windward. Spraying can be done anytime during the day.

**Blooms:** Cut your blooms preferably in the morning when one or two florets are open. Use a small sharp narrow blade, run down spike, then cut through with a slanting cut. Be sure to leave four or five leaves on plant to mature bulb. Place spike in water, fresh water every day, cut off half inch of spike each day. Spike will open to tip. Use tips for floating table decorations, corsages. To keep for shows, place in cool basement; must have some ventilation.

**Digging:** Bulbs blooming in July can be dug six weeks after blooming. Those blooming in September will mature in four weeks. Dig plantings before ground freezes. Dig with a fork, lift out plant, cut top off flush with bulb, place in shallow trays (boxes) not over four inches deep. (Burn tops when dry.) Do not leave in hot sun, protect from frost. Dust with 5% D.D.T. After drying three to five weeks, remove old bulbs from new. Burn old bulbs. Do not remove husk from new bulb. When clean and dry, dust again thoroughly.

**Storing:** Store in cool, dry part of basement, 35° F., to 45° F. is about right. Bulbs stored under moist conditions will be more susceptible to disease and storage rot.

"The order I received from you last spring was more than satisfactory. I am looking forward for next year's catalog."

H. Jacobsen — Washington

"Received order of bulbs in fine condition. Thanks for overcount and bulb of Antietam. I must say this, you do have good clean stock of bulbs. Will be sending for more next season."

Stephen Thompson — Pennsylvania

"I am enclosing check to cover order for bulbs. The bulbs I purchased from you last year were the cleanest bulbs I have purchased anywhere at any time. The flowers they produced were a delight to the eye."

Rev. W. C. Jamison — Virginia

"My order came thru OK. Thanks for the generous count and extras."

W. Neil Adams — Iowa

"Received the nice bulbs in perfect condition. I do thank you so much for your generosity and especially for the ANTIETAM; this I am giving a very special place in my garden. Thanks again."

Mrs. J. W. Miller — Virginia

"ANTIETAM turned out beautifully. I have seen a lot of reds at the show this year and it had them all stopped a mile in placement and pure color. Reserve me some medium."

E. L. Scully — New Jersey

"Enclosed is order for bulb and bulblets of your PB4 and RPB4. I saw your PB4 at the Lebanon show last August and liked it a lot. I liked it better than the basket of Spic and Span along side of it. I am a cut flower grower and I liked the number of flowers it had opened."

E. G. Blacker — Pennsylvania

NOTE: PB4 is now named ELEVATION and RPD4 is now DREAMLAND.

"Happy to inform you that your ANTIETAM won for me first place in the Glad display of the recent flower show of the Garden Club of Harrisburg."

William A. Fenical, Jr. — Pennsylvania

"We are so proud of the bulbs you sent us. You were very generous and we thank you so much."

Mrs. W. B. Cantieri — Virginia
